

GV-AS110 With Built-in Reader

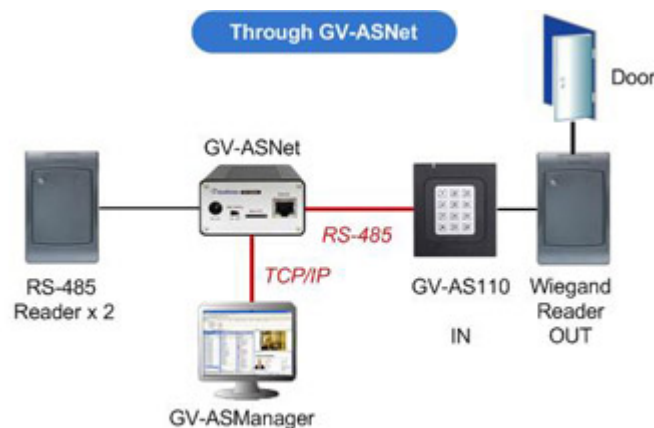

Working as a standalone solution, GV-AS110 is a card reader and also a single door controller. It is possible to add one more card reader to GV-AS110 for entry and exit applications. GV-AS110 has the capability to store up to one thousand cards. When GV-AS110 is being used as a standalone unit, the programming is either done on the keypad or from the software GV-ASManager through the RS-485 connection.

GV-AS110 is suitable not only for any normal door control but also for parking gate and elevator control. GV-AS110 is an economic solution for access control.
